If you own a business on the Gold Coast, and you're not getting new customers, clients or patients on the Internet, then you're probably missing out on hundreds, if not thousands of leads and sales you could be getting. Instead, those people are buying from your competition.

Let's face it – I only have a “Yellow Pages” *because they deliver it whether I want it or not.* If I want to find anything on the Gold Coast, I'll go straight to the internet, every time.

Understand This: YOUR prospects are doing the same thing!

The Internet is now **so ingrained** in people's minds and throughout their lives, it's the first place they turn to when they want to find products and services in their local area.

So here's how to appeal to all the people who only pay attention to something if it's "on the internet" (and how to get them to pay attention to YOU and YOUR business)

This is for Gold Coast Business Owners who would rather get customers on the internet than with expensive "traditional advertising", **if only someone would tell them:** ...If this sounds like the problems you're having, if you want to grab your share of online searchers, then **you're definitely in the right place.**

WHY they're not getting sales from the internet *despite having a great product or service*

How to get **more people walking in and calling up** from free advertising on the internet

Just how many people are searching online for your business in your local area? (*The answer may surprise you...*)

How long it takes to get a website built and getting customers, and what's involved

If you've been paying for help with getting customers on the internet but aren't happy with the results, your answer is here

Why the "experts" who keep telling you to pour all your advertising funds into extensive online ad campaigns are **wrong**

How you can change your website as easily as you click a mouse and type a sentence

If your business isn't growing as it once did and you **want to reignite your sales, read on...**

Here's how ordinary *Gold Coast Business Owners* can make thousands of dollars in extra sales on the net:

There's no sales pitch, no cost, no obligation, just a brief letter with the info you need to get ahead of the rest & leave your competition in the dust.

This **isn't** about sending out spam emails, you **won't** need to buy some super expensive software, and getting customers on the net is going to be *as simple as creating a word document.*

If you're almost satisfied with your business (*but not quite*) and can't quite see where it's going wrong, get this letter today and start reeling in those online searchers looking for YOU...before they find your competition!
